1. Executive Summary

This SEO audit report analyzes the internal linking structure, on-page keyword optimization, and competitive positioning of TheAgileNest.com for May 2026. A comprehensive crawl of 22 pages was conducted to evaluate site architecture, content relevance, and search visibility.

During this period, the site had 22 active pages with 332 internal links. The analysis includes keyword frequency, heading structure, and comparison against 3 key competitors in the PMP training space.

22	332	22	1
Total Pages	Internal Links	Pages w/ Links	Orphan Pages

Audit performed by TechNext96. Data collected from theagilenest.com and competitor sources.

2. Internal Link Distribution

The table below shows each page, how many internal links it contains (outgoing), and how many internal links point to it (incoming). A balanced link distribution spreads authority across the site.

#	Page	Outgoing	Incoming	Status
1	/blog	23	31	Active
2	/	19	47	Active
3	/pmp	15	24	Active
4	/capm	15	24	Active

5. Keyword Research

Analysis of on-page keywords found across all site pages. Top single keywords and multi-word phrases extracted from page content, titles, and headings.

5.1 Top Single Keywords

Most frequently occurring meaningful words across all page content (excluding common stop words).

#	Keyword	Frequency
1	null	3526
2	children	3525
3	classname	2679
4	next	1433
5	undefined	1410
6	div	1112
7	static	1002

13	children null	420
14	stroke linecap round	407
15	xmlns http	404
16	http www	404
17	www org	404

#	Keyphrase	Frequency
18	org 2000	404
19	2000 svg	404
20	svg width	404

5.3 Title Tag & Meta Description Audit

Every page should have a unique, descriptive title tag (50-60 chars) and meta description (120-160 chars).

#	Page	Title Tag
1	/	TheAgileNest Project Management, Cost Estimation & Professional Training
2	/project-management	Project Management for Construction Project TheAgileNest
3	/cost-estimation	Quantity Surveying & Cost Management TheAgileNest
4	/training	Professional Training Services TheAgileNest
5	/pmp	TheAgileNest Premier PMP® Training Global Certification TheAgileNest
6	/capm	CAPM Certification Training & Exam Prep TheAgileNest
7	/pmicp	PMI Construction Professional (PMI-CP)® Certification TheAgileNest
8	/about	About Us TheAgileNest
9	/consulting	Project Management Consulting TheAgileNest
10	/blog	Blog & Resources TheAgileNest TheAgileNest
11	/partner	Become a Partner TheAgileNest TheAgileNest
12	/contract-management	Construction Contracts TheAgileNest
13	/blog/TheAgileNest-impact-construction	TheAgileNest's Impact on 2026 Construction Management TheAgileNest

22	/blog/strong-foundations-planning-prevent-costly-corrections	1	Strong Foundations in Planning Prevent Costly Corrections La

6. Competitor Analysis

Comparative analysis against 3 key competitors in the PMP certification training space. Data collected from competitor homepage and primary landing pages.

6.1 Title Tag Comparison

Title tags are a primary ranking factor. They should include target keywords and be under 60 characters.

#	Site	Title Tag
—	TheAgileNest (You)	TheAgileNest Project Management, Cost Estimation & Professional Training
1	Master of Project Academy	Master of Project Academy - Leading Project Management Training
2	Simplilearn (PMP Page)	PMP Certification

6.2 Meta Description Comparison

#	Site	Meta Description
—	TheAgileNest (You)	TheAgileNest delivers expert PMP certification training, precision AI driven construction cost estimation, and strategic
1	Master of Project Academy	(blocked / no description)
2	Simplilearn (PMP Page)	PMP Certification

6.3 H1 & Internal Links Comparison

#	Site	H1s	Page Links	H1 Text
—	TheAgileNest (You)	1	19	Strategic Planning.Precision Delivery. Total Contr
1	Master of Project Academy	1	57	#1 Project Management Training Provider *
2	Simplilearn (PMP Page)	1	1	PMP Certification

6.4 Competitive Insights

Key Observations:

- Competitors in the PMP training space emphasize "PMP certification," "exam prep," and "training" prominently in title tags and H1s.
- Most competitors use a single H1 per page focused on their primary service offering, which is a best practice.
- TheAgileNest differentiates with "PMP certification training" combined with "construction cost estimation" — a unique value proposition.
- Competitors with higher internal link counts on their homepage tend to have stronger site architecture for SEO.
- Consider reviewing competitor backlink profiles and content strategies for additional gap analysis.

7. Orphan Pages & Broken Links

7.1 Orphan Pages

The following 1 page(s) have no internal links pointing to them. Orphan pages are invisible to crawlers and users unless directly navigated to.

#	Orphan Page
1	/contract-management

8. Recommendations

Internal Linking

1. Strengthen deep links. The homepage and navigation receive most internal links. Add contextual links from blog posts to deeper service pages.
2. Fix orphan pages: add internal links to /contract-management from relevant content.
3. Ensure all pages are within 3 clicks from the homepage.

Keyword & Content

1. Ensure every page has a unique title tag (50-60 chars) containing the primary target keyword.
2. Each page should have exactly one H1 that matches the page's primary topic. 0 page(s) currently deviate from this.
3. Strengthen topic clusters around "PMP certification," "cost estimation," and "project management consulting" with internal links between related content.
4. Add more blog-to-service cross-links — blog posts are content hubs that should distribute authority to service/landing pages.
5. Review meta descriptions — ensure each is unique, compelling, and within 120-160 characters.

Competitive Positioning

1. Differentiate title tags with "PMP Certification Training + Cost Estimation" — combine your two core strengths.
2. Review competitor sites for content gaps — identify topics they cover that you don't and create content.
3. Monitor competitor backlink profiles using tools like Ahrefs or SEMrush to identify link-building opportunities.

Methodology

Data Collection: Site pages were crawled from <https://theagilenest.com>. Internal links, anchor texts, titles, meta descriptions, and headings were extracted from each page. Competitor data was gathered from publicly accessible homepage content. Self-references and asset URLs were excluded from link counts.
